About This Game

Space Cat is an arcade platforming game. The goal is to collect as many points as possible without dying. The game's terrain is constantly being manipulated by destructive forces, such as bombs and missiles, and UFOs, which randomly generate new terrain. No two playthroughs of the game are the same!

There are three different game modes. Classic Mode, the main game, is as described above. Giant Mode lets you experience the game on a map that's 4x as large as the original game. Battle Mode allows you to play a free-for-all deathmatch with up to four players on six unique stages.

The game's options menu allows for a completely personalized gameplay experience. You can toggle items and movement options to adjust the difficulty to whatever you feel is best for you. If you want an especially difficult game, turn off all movement options and turn on more hazards, and for an easier game, vice versa...

Worst, game, ever.. What fun this is! It's a music making app that uses the physics of bouncing drops to create the notes. See the videos to understand. I'm uploading an example to my YouTube.. Only played a little but..

So far, it's a great little game. Just on single player, its fun and weirdly addictive. Quite difficulty too, even at the medium setting.

Haven't tried local multipalyer yet, need to find a friend so i can invite them round for a game. (no online multiplayer unfortunately, hopefully that will come later)

Would definitely recommend, especially for the price.. Really polished and fun. The controls are really great, and it's just a great example of a relatively simple concept that's been executed very well. The graphics and music are a great fit too. Especially loved the missile levels.. This DLC is great. 3 different versions (LNER Modern, BR Brunswick and LNER Double Tender). Sounds might not be the best but there is the Steam Sounds Supreme which you can buy for £35 to make it better for the LNER Modern & BR Brunswick versions. The LNER Double Tender has it's own sound pack for £33.50.

WOW!

A playable Glitch with a titlescreen! I loved all the 10 Minutes I played.

And you can see surely the dev had a good half an hour of hard work to dev this gem.

I am just unsure about the price... should be much higher. Only 7 Euros make the game look a little bit cheapish.

Always thought it was just a rumor, that you can sell EVERYTHING to Steamcustomers. Till now.

Thumbtack, you are my personal hero! :). Two words: Ocean's Eleven.. Classic HOS game, but for one thing : silhouette HOS .. they look like HOS but you actually end up manipulating objects forward and backward, moving them from left to right.. untill they fit the perfect shape to a certain angle. I found these quickly boring. Some achievements will require you to accomplish them under a minute.

As most games of the genre, the story isn't ambitious but it gets the job done, driving you from many nice and somewhat easy puzzles to few classic HO scenes and some silhouette HO thingy.

I still recommend it, especially if on sales.

One big pro : The more or less chip music of the retro arcade video game "Flap for Life" (a game in the game) with many chip sounds of 8-bit music. That was a good and enjoying surprise!. This game offers a really fun twist on Katamary Damacy, and at 25% off, I paid CA\$10.86 to play the game on my computer, instead of CA\$6.99 to play it on my phone. The graphics are charming, the mechanic works well, and as far as I can tell, I paid a 50% price premium for the pleasure of playing it on my computer. The game isn't very long – I played it in a single 107-minute sitting – and the dollar-per-minute value is significantly better on mobile. Is my point clear yet? It's a fun little game, and it's absurdly over-priced on PC.. I'm so confused. From the menu, to not being able to walk through certain things, to the.... giant garlic.

At the moment there's really no game. All you do is navigate a bit of a maze and collect masks.

Check out my video for more impressions and gameplay: <https://youtu.be/Vpm-Pe6Ecgwgg>
[.have fun and dont forget to be CRAZY and screaming like a girl. Wonderful, relaxing and emotional soundtrack. It's a high-point of the experience of the game, and great to listen to casually, too. This is an easy recommendation to anyone with an interest in VN soundtrack.. "It has been confirmed that this title does not run correctly in a system environment in which the Windows 10 Anniversary Update from September 2, 2016 has been applied. Please note this before purchase."](#)
[But when will you solve this problem?](#)
[edit \uff1a They already solved the problem, so now I would recommend it.](#)
